Lion Marine Batteries

The demands of the Australian Marine battery market call for advanced product quality, durability and high performance in often testing and demanding Marine environments.

Lion Batteries meets the demands of all battery markets including specialty products for Marine Starting, Marine Dual Purpose, Marine Deep Cycle and Marine Recreational applications. Lion Batteries are the battery of choice for professional marine operators, owners of recreational and leisure craft, wind sport enthusiasts and users of a multitude of marine related battery applications.

Lion Batteries is an Australian owned family business serving the Australian battery market for over 60 years.

Lion Batteries offer a comprehensive range of quality Marine Batteries to suit all Marine Starting, Dual Purpose, Deep Cycle and Recreational applications

Power Boats

- ✓ Launches
- ✓ Charter Vessels
- ✓ Recreational Fishing
- ✓ Cruisers

Sailing Boats

- ✓ Racing Yachts
- ✓ Pleasure Yachts
- ✓ Catamarans

Commercial Vessels

- ✓ Ferries
- ✓ Passenger craft
- ✓ Tugs and Barges
- ✓ Commercial Trawlers
- ✓ Commercial Fishing

House Boats

- ✓ Commercial Leasing
- ✓ 2 Volt Cell Applications

Personal Water Craft

- ✓ Jet ski's
- ✓ Sea-Doo's

CONVENTIONAL LOW MAINTENANCE

✓ **Marine Starting Batteries**

High cranking hybrid design technology to suit modern engine starting needs. Incorporating “hot melt plate lock” protection against wave shock and engine vibration to ensure extended battery life.

✓ **Marine Deep Cycle Batteries**

Heavy Duty design for demanding Marine Deep Cycle applications. Vent plug accessible for ongoing maintenance of electrolyte levels to ensure extended battery life.

SEALED MAINTENANCE FREE (SMF)

✓ **Marine SMF Starting Batteries**

Calcium/Calcium SMF technology with patented “positive plate tissue” design to achieve extended service life. Dual Terminal design for multipurpose applications.

✓ **Marine SMF Dual Purpose Batteries**

Designed for users who are seeking extended hours of cycling (AH) with no compromise on cranking capacity (CCA). Dual Terminal design for both starting and easy connection of accessories.

VALVE REGULATED LEAD ACID

✓ **Absorbed Glass Mat (AGM) Dual Purpose Marine Batteries**

Fully sealed dual purpose Starting and Deep Cycle batteries designed for heavy demand applications. Dual Terminal design with multi position usage capabilities (no spillage) ideally suited for yachting applications.

✓ **Gel (Gelled Electrolyte) Technology Deep Cycle Marine Batteries**

Premium marine battery technology featuring fully sealed battery design allowing for multi position usage capabilities and flexibility to locate the battery into difficult locations. Gel technology is suitable for enclosed areas with no risk of gas escape and allows 100% cycling discharge with no deterioration of battery life or performance.

RECREATIONAL PWC (Personal Water Craft)

✓ **Recreational Marine Batteries**

Available for Sealed AGM, Sealed Maintenance Free and Conventional PWC Marine applications and are ideal for Jet Skis and Marine recreational uses.

LION

The King of Batteries

Lion Batteries offer a complete range of quality battery products for all automotive, deep cycle, traction, standby, solar and specialty purposes. With Lion Batteries you can have confidence in selling quality products and prominent brands, supported by a technically competent and customer focused Australian owned family company.
